

Space Efficiency Chart

The following information provides an estimated comparison of space efficiency between 225 litres/60gal barrels and Flexcubes. Each example has been calculated on the same floor area equal to 100 square meters (10 x 10 meters) or 1,076 square feet (32.8 x 32.8 feet).

Flexcube Evolution 1000L

	Stack	Capacity each	Units per 100m ²	Total capacity per 100m ²
Flexcube	4	1000 litres / 265 gal	224	224,000 litres / 59,200 ga
Barrel	6	225 litres / 60 gal	600	135,000 litres / 35,700 gal

Flexcube Evolution 2000L

	Stack	Capacity each	Units per 100m ²	Total capacity per 100m ²
Flexcube	2	2000 litres / 530 gal	112	224,000 litres / 59,200 ga
Barrel	6	225 litres / 60 gal	600	135,000 litres / 35,700 gal
